                                                                                                                                                                                  | eninm                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 200.8-D                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 티                                                                                                          | 3        ### APPENDIX IV – ANALYSIS OF REVENUES AND EXPENDITURES

This appendix contains analyses of the raw data shown in Appendix II, using the most appropriate volume figures, to calculate the:

- Actual Revenue, Expenditure and Net County Cost by Year
- Calculated and Actual Revenues
- Estimate of Outsourcing Cost

### Actual Revenue, Expenditure and Net County Cost by Year

	2011-12	2010-11	2009-10	2008-09
EXPENDITURE				
Salaries & Benefits	\$1,591,216	\$1,694,000	\$1,650,000	\$1,399,000
Service and Supplies	\$607,466	\$508,000	\$680,000	\$755,000
Capital Assets	\$12 <del>4</del> ,135	\$0	\$0	\$146,000
Total Expenditure	\$2,322,817	\$2,202,000	\$2,330,000	\$2,300,000
REVENUE	2011-12	2010-11	2009-10	2008-09
Intrafund Transfers				
Public Health	\$35,538	\$37,000	\$42,000	\$62,000
Coroner	\$0	\$0	\$0	\$0
Various	\$351	\$0	\$0	\$5,000
Revenue				
Public Works	\$918,035	\$838,000	\$1,017,000	\$879,000
Others	\$7,089	\$10,000	\$10,000	\$4,000
Fire Department	\$49,190	\$30,000	\$30,000	\$0
Total Revenues	\$1,010,203	\$915,000	\$1,099,000	\$950,000
Net County Cost	\$1,312,614	\$1,287,000	\$1,231,000	\$1,350,000

### APPENDIX V – GENERAL INFORMATION RELATING TO DPH

This appendix sets out general information about the mission, vision, objectives, plans and role of the DPH as it relates to environmental pollution, environmental water, environmental chemistry, and the ETL.

### Public Health Laboratory - A Mandated Function

http://publichealth.lacounty.gov/lab/labmandate.htm

A medical laboratory test is any examination of material derived from the human body for the purpose of providing information for the diagnosis, prevention, or treatment of any disease or impairment or for the assessment of the health of human beings. The State of California regulates two categories of laboratories where medical testing is a primary activity: clinical laboratories including hospital laboratories, and public health laboratories. Although these laboratories perform many of the same testing procedures, there is a major difference in their primary function. Clinical laboratories assist clinicians with individual patients; public health laboratories support the health officer whose patient is the community. The clinical laboratory supports primary patient care; the public health laboratory supports programs to prevent and control communicable disease and environmental pollution, and plays a key role in epidemiologic investigations of disease outbreaks. In addition, the public health laboratory serves as the local infectious disease reference laboratory for clinical laboratories in the same jurisdiction.

There are other significant distinctions between clinical and public health laboratories. As of October 12, 1995, amendments and additions to the California Health and Safety Code require that local health departments of a city or county have available the services of a public health laboratory; local health departments are not mandated to provide clinical laboratory services. Laboratory directors of clinical laboratories may be pathologists but public health lab directors must be certified public health microbiologists. Personnel reporting test results in a clinical laboratory must have a clinical technologist license; personnel reporting test results in a public health laboratory must be certified as Public Health Microbiologists. Clinical technologists cannot perform testing in a Public Health Laboratory unless they are, also, a Public Health Microbiologist. Therefore, a private (or public) clinical laboratory cannot function or substitute as a public health laboratory unless it meets all the criteria stated above.

A generalization of the workload of the Los Angeles County Public Health Laboratory is all testing necessary to support all disease control and environmental health activities within Public Health Programs and Services as well as infectious disease reference testing for all public and private clinical laboratories within Los Angeles County. The Public Health Laboratory supports epidemiologic investigations and programs to prevent and control infectious disease of humans and animals as well as pollution of air, water, and food. Organizationally, PHL is divided into the following sections: Molecular Biology (including Restriction Fragment Length Polymorphism analysis with and without Pulsed Field Gel Electrophoresis technology), General Bacteriology (includes food microbiology and botulism testing), TB and Mycology, Parasitology, Virology (includes opening and autopsy of animal heads for rabies testing), Serology (both human and animal), Environmental Microbiology, Environmental Chemistry, and Support Services.

All staff members testing and reporting laboratory results hold certificates from the state of California in public health microbiology. The remainder of the staff are laboratory assistants and support personnel.

### **Toxics Epidemiology Program**

http://publichealth.lacounty.gov/eh/TEA/ToxicEpi/index ToxicsEpi.htm

One of the programs of the Department of Public Health is the Toxics Epidemiology Program. It is the mission of the Toxics Epidemiology Program to assess and reduce toxic-related disease and injury, to advocate for solutions to toxic exposures and to educate the public so that they are empowered to protect themselves, their families and their communities in Los Angeles County.

### Bureau of Toxicology and Environmental Assessment <a href="http://publichealth.lacounty.gov/eh/TEA/aboutTEA.htm">http://publichealth.lacounty.gov/eh/TEA/aboutTEA.htm</a>

One of the bureaus in the Department of Public Health is the Bureau of Toxicology and Environmental Assessment. The Bureau of Toxicology and Environmental Assessment is composed of physicians, nurses, epidemiologists, researchers, industrial hygienists, environmental specialists and home inspectors, who identify, control and prevent unwanted health effects associated with toxic agents in the Los Angeles County population. Our vision is for a Los Angeles County where people are safe from toxic agents and can live, work and play in a non-hazardous environment. Three programs carry out these goals: the Toxics Epidemiology Program, the Environmental Hygiene Program and the Lead and Healthy Homes Program. The Bureau listens to concerns about possible toxic exposures in areas of residence, schools and places of business throughout the county. The Bureau responds to these concerns through education and outreach, consultation services and collaborative efforts with regional and state

agencies. In addition, the Bureau performs targeted investigations of potential environmental

### **Bureau of Environmental Protection**

http://publichealth.lacounty.gov/eh/EP/aboutEP.htm

exposures that are relevant to the population of Los Angeles County.

One of the bureaus in the Department of Public Health is the Bureau of Environmental Protection. The Bureau is comprised of seven, very technical, specialty programs: Cross Connections and Water Pollution Control, Drinking Water, Emergency Preparedness & Response, Land Use, Radiation Management, Recreational Waters, and Solid Waste Management. Although the programs are very diverse in nature, they share one common thread, the protection of public health as well as the environment.

The Drinking Water Program is responsible for regulating small water systems pursuant to state laws and regulations. This includes processing applications and issuing permits for Non-Production Wells, and collecting water samples from small water systems to monitor the levels of bacteria, chemicals, and other elements set forth in the State Drinking Water Standards. The Recreational Waters Program is responsible for the enforcement of laws and regulations relating to approximately 3,200 public pools in Los Angeles County. This includes swimming pools, spas, wading pools and special purpose pools located at hotels and motels, public and

private schools, health clubs, city and county parks, mobile home parks, resorts and organizations, medical faculties, and water theme parks. In addition, the program is responsible for the plan approvals of all new public pools and renovations of existing pools. The program also certifies individuals as Swimming Pool Service Technicians. All individuals engaged in the business of maintaining pools are required to be certified by Los Angeles County.

We are also responsible for monitoring ocean water and contact sport areas and taking appropriate action when water quality criteria are not met or when an incident, such as a sewage spill, occurs. In addition, staff inspect and conduct bacteriological tests at fresh water swim areas.

### The program includes:

- Testing pool water for pH, chlorine residual, alkalinity, and when necessary, cyanuric acid levels, total dissolved solids and calcium hardness
- Conducting inspections and bacteriological monitoring of fresh water swim areas

### Plans to Meet Objectives (Services, Budget, Funding, Equipment, Staff,

The PHL has a draft Strategic Plan titled "Strategic Plan 2011-2016. In that plan it states:

"For over six decades, the public health laboratory has been responsible for supporting the diagnostic and environmental testing needs of Los Angeles County."

"The laboratory is also accredited by ELAP (Environmental Laboratory Accreditation Program) to perform analyses using approved methods on drinking water, recreational water, and wastewater."

"The laboratory provides a range of testing services covering the areas of Bacteriology, Mycobacteriology, Mycology, Parasitology, Virology, Immunology, Molecular Diagnostics, Environmental Microbiology, and Environmental Chemistry."

"PHL strategic plan specific objectives have been carefully chosen to support the County of Los Angeles Department of Public Health Strategic Plan in addition to national public health objectives. In 2002, the Association of Public Health Laboratories published a report which defined 11 core functions as part of laboratory organizational capacity (MMWR, 2002, Vol. 51/No.RR-14). . . . . . . . The core essential laboratory functions are defined in sub-objectives 11.1-11.11. These sub-objectives include . . . . . 4) environmental health and protection"

"Analysis of current PHL functions and services indicate that there are five areas that should be focused on for improvement during this five-year period: 1) integrated data management, 2) environmental health and protection, 3) food safety, 4) laboratory improvement and regulation, and 5) public health related research."

Strategic Priority 4: Expansion of Comprehensive Public Health Laboratory Services Objective 4.2: Enhance environmental chemistry testing services to include chemical analysis of drinking water and additional surveillance analyses of environmental hazards to community health

Timeline For Strategic Plan:

Year 3: Expansion of comprehensive laboratory services.

Based on these statements by the PHL it would seem that taking the ETL under its wing would fit in with the planned strategy.

### APPENDIX VI - SURVEY FORM FOR COUNTY LABORATORIES

### Los Angeles County Water Analysis Survey Introduction On behalf of the Los Angeles County Department of Public Health, CGR Management Consultants is conducting a survey of laboratories that analyze water in order to determine the best organizational location for such a laboratory within the Los Angeles County organization. Please assist us by answering 14 questions relating to the water analysis performed by your County laboratory. The survey should take only several minutes to complete. To verify Los Angeles County's approval for this survey please contact Dr. Robert Kim-Farley, Director, Communicable Disease Control and Prevention Division at (213) 989-7161 or rkimfarley@ph.lacounty.gov. If you have questions related to the survey or technical issues related to completing the survey, please contact Jim Kennedy of CGR Management Consultants at (310) 230-3543 or jekennedy@ogmic.com. Please respond before December 7, 2012, if possible. Thank You. **CGR Management Consultants**
